## 2010 New Plant List

Plant heights and widths estimated at 10 years

### **Abies (Fir)**

Abies alba 'Argan' 'Argan' European Fir

A dwarf form of European Fir that has dark short needles.

Ht: 2' Spread: 3'

Full sun-part shade

Zone 3-6

Abies concolor 'Blue Cloak' 'Blue Cloak' Concolor Fir

Powdery blue long needles on this upright pyramidal form. A strong central leader with side branches sweeping downward. Slower growing.

Ht: 8-10'

Full sun-part shade

Zone 3-6

Abies concolor 'Eagles Point' 'Eagles Point' Concolor Fir

A very dwarf form that grows only about 2" per year. Great for rock gardens.

Ht: 18" in 10 + years

Full sun-part shade

Zone 3-6

Abies concolor 'Masonic Broom' 'Masonic Broom' Concolor Fir

A miniature form of Concolor Fir growing only about 1" per year. Habit is globe shape and needles are light blue.

Ht: 12"

Full sun-part shade

Zone 3-6

Abies concolor 'WinterGold' 'WinterGold' Concolor Fir

A slower growing pyramidal form. Greenish-blue needles turn gold color in the winter.

Ht: 6'

Full sun-part shade

Zone 3-6

Abies fraseri 'Wingles Dwarf' 'Wingles Dwarf' Fraser Fir

A dwarf pyramidal form.

Ht: 3'

Full sun-part shade

Zone 5

Abies fraseri 'Blue Bonnet' 'Blue Bonnet' Fraser Fir

Nice blue needles on a globe form.

Ht: 3' Spread: 3'

Full sun-part shade

Zone 5

Abies koreana 'Green Carpet' 'Green Carpet' Korean Fir  
A dwarf form that is a flat round spreader. Dark green needles.  
Ht: 2' Spread: 3'  
Full sun-part shade  
Zone 3-6

Abies lasiocarpa 'Green Globe' 'Green Globe' SubAlpine Fir  
A dwarf globe form of Alpine Fir. Needles are short and green. Nice plant for a rock garden.  
Ht: 3' Spread: 3'  
Full sun-part shade  
Zone 3-6

Abies procera 'Glauca' Blue Noble Fir  
Powder blue needles on a large growing upright pyramidal Fir.  
Ht: 20' 30-40' at maturity  
Full sun-part shade  
Zone 5

Abies procera 'Silver' 'Silver' Noble Fir  
Striking blue color! Slower growing upright pyramidal Fir.  
Ht: 8-10'  
Full sun-part shade  
Zone 5

### **Acer (Japanese Maples)**

Acer palmatum 'Beni Otake' 'Beni Otake' Japanese Maple  
An upright red linearlobum type—leaves are narrow. Habit it somewhat upright with horizontal branching. Fall color is bright red.  
Ht: 7-8'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Deshojo' 'Deshojo' Japanese Maple  
Leaves emerge a bright red color but quickly turn pinkish with green. Slower growing, great Bonsai plant.  
Ht: 3'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Fireglow' 'Fireglow' Japanese Maple  
A beautiful intensely red upright form that keeps its summer red color better than 'Bloodgood' even in hot sunny locations. Does best in full sun.  
Ht: 12-15' in 10 years 20-25' at maturity  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Goshiki Shidare' 'Goshiki Shidare' Japanese Maple  
A cutleaf variegated form. Like most dissectums, it has a cascading habit. Pink, white, red and green coloration are on the leaves. Somewhat slow growing. This plant does best in partial shade  
Ht: 3' Spread: 3'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Green Hornet' 'Green Hornet' Japanese Maple  
New introduction—still under evaluation  
Ht: ?  
Zone 5 -7

Acer palmatum 'Jerre Schwartz' 'Jerre Schwartz' Japanese Maple  
A robust and reliable red dwarf leaves that are deeply divided to give a unique texture.  
Ht: 3-4'  
Zone 5 -7

Acer palmatum 'Oto Hime' 'Oto Hime' Japanese Maple  
A nice dwarf green selection. Named after the "fabled" Queen Otohime who reigned at the bottom of an ocean kingdom. A great Bonsai plant. Fall color is orange-yellow.  
Ht: 3'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Peaches and Cream' 'Peaches and Cream' Japanese Maple  
The variegation color is best described as "a peach in a bowl of milk" with green venation. Upright habit. Slower growth.  
Ht: 5'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Pixie' 'Pixie' Japanese Maple  
Bright red leaves on a slower growing plant. Good plant for small areas  
Ht: 5'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Purple Ghost' 'Purple Ghost' Japanese Maple  
New introduction—still under evaluation. One of the "Ghost" series.  
Ht: ?  
Zone 5

Acer palmatum 'Searles Variegated' 'Searles Variegated' Japanese Maple  
A new variegated upright form. New leaves have white, pink & green on them. Later in the season they change to dark green with pink edges. Slower growing.  
Ht: 6-8'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Sherwood Flame' 'Sherwood Flame' Japanese Maple  
A great upright red-leafed form. Has a little smaller leaf than 'Bloodgood' that does not bronze out in the summer. Holds a great red color.  
Full sun-part shade  
HT: 12' in ten years 18-20' at maturity  
Zone 5 -7

Acer palmatum 'Skeeter's Broom' 'Skeeter's Broom' Japanese Maple  
A dwarf red clone derived from a witch's broom from 'Bloodgood'. Good red leaf color throughout the summer.  
Ht: 6-8'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Spring Ghost' 'Spring Ghost' Japanese Maple  
A green and white reticulated leaf. Color is best in spring, then fades in the summer heat. Does best in partial shade. Slow growth.  
Ht: 5'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Sunset' 'Sunset' Japanese Maple  
A great dissectum with an outstanding leaf color. The base color is bright green with an overall tinting of rust on mature leaves. Habit is cascading. If in full sun, the rusty color turns to bright orange.  
Ht: 3' Spread: 3'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Tamukeyama' 'Tamukeyama' Japanese Maple  
A bright red leafed dissectum form. Typical cascade shape. Holds color very well in the summer. Fast growth for a dissectum. One of the best!  
Ht: 5' Spread: 5'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Taylor' 'Taylor' Japanese Maple  
Great red and pink leaves on an upright slower grower. Pink highlights are somewhat slow to show in the spring but they intensify into the summer. Needs some protection from wind.  
Ht: 5'  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'The Bishop' 'The Bishop' Japanese Maple  
A great upright red-purple form. Does not bronze out. Excellent crimson-red fall color.  
Ht: 10-12' in ten years 25' at maturity  
Full sun-part shade  
Zone 5 -7

Acer palmatum 'Tsuma Gaki' 'Tsum Gaki' Japanese Maple  
Similar to 'Tsuma Beni'. The spring leaf color is a soft yellow with a bright red margin. As the summer progresses, the leaves become more green with an enlarging red margin. Fall color is red-orange-crimson-yellow. Spectacular!  
Ht: 8-10'  
Full sun-part shade  
Zone 5 -7

Acer shirasawanum 'Moonrise' 'Moonrise' Japanese Maple  
New leaves have a bright salmon color then mature to a golden yellow. Fall color is a great red-orange.  
Ht: 8'  
Full sun-part shade  
Zone 5 -7

Acer shirasawanum 'Red Dawn' 'Red Dawn' Japanese Maple  
Larger than normal leaves with narrow lobes. New growth is reddish purple that fades in the summer heat. Fall color is a spectacular red-orange.  
Ht: 10'  
Full sun-part shade  
Zone 5 -7

#### **Acer (Other Maples)**

Acer platnoides 'Waldersii' 'Waldersii' Norway Maple  
A rare form of Norway Maple. The leaves are light green with cream colored speckles on them. Slow growing.  
Ht: 10' in ten years 30' at maturity  
Full sun-part shade  
Zone 4 -7

*Acer rubrum* 'Candy Ice'

'Candy Ice' or 'Yellow' Red Maple

A new unusual form of our native red maple. Leaves emerge green with cream and pink blotches on them. Fall color is crimson.

Ht: 15' in ten years

Full sun-part shade

Zone 4-7

### **Aesculus (Buckeye & Horsechestnut)**

*Aesculus x carnea* 'Aureomarginata'

'Aureomarginata' Buckeye

A gold edged leaf form with reddish-pink blooms in the spring. Upright rounded habit to about 30-40'. Does best in light shade and like all Buckeyes and Horsechestnuts, they will be scorched by early fall.

Ht: 30-40' at maturity

Full sun-part shade

Zone 4-7

*Aesculus turbinata* 'Morton's Variegated'

'Morton's Variegated' Japanese Horsechestnut

Large green leaves with splashes of white variegation. White blooms in late spring. Large tree at maturity.

Ht: 50' at maturity

Full sun

Zone: 5-7

### **Chamaecyparis (Chamaecyparis)**

*Chamaecyparis* 'Iceberg'

'Iceberg' Chamaecyparis

A great white color on a small round evergreen. An actual Witch's broom of the popular selection 'Snow'. This plant has a smaller size, more variegation and a tighter habit.

Ht: 2' Spread: 2'

Full sun-part shade

Zone: 5-7

### **Cornus (Dogwood)**

*Cornus Kousa* 'Limon Ripple'

'Limon Ripple' Kousa Dogwood

A nice yellow variegated form of Kousa Dogwood with white flowers. Shorter and bushier in habit, it is a nice eye catcher!

Ht: 15'

Full sun-part shade

Zone 5 -7

*Cornus Kousa* 'Pollywood'

'Pollywood' Kousa Dogwood

Nice large white flowers and good clear green leaves. Habit is upright when young and then broadens with age.

Ht: 20'

Full sun-part shade

Zone 5 -7

*Cornus Kousa* 'Fastigiata'

Fastigate Kousa Dogwood

A unique fastigate form with large white flowers. Red to orange fall color. Great for narrow spaces.

Ht: 10-12' Spread: 3-4'

Full sun-part shade

Zone 5-7

*Cornus officinalis* 'Kintoki'

'Kintoki' Japanese Cornell Dogwood

Bright masses of yellow flowers in early spring! Shiny green foliage that hangs tough through the summer heat. Good flakey bark as the plant matures. Habit is rounded at maturity.

Ht: 15-20'

Full sun-part shade

Zone 4 -7

### **Fagus (Beech)**

*Fagus sylvatica* 'Felderbach' 'Felderbach' European Beech

A dwarf green selection with smaller than normal leaves.

Ht: 2-3'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Franken' 'Franken' European Beech

A curiously variegated form with splashes of white on the green leaves. Slower than normal growth but will ultimately be a small tree.

Ht: 6-8'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Marmorata' 'Marmorata' European Beech

Speckles of white variegation in the green leaves. Best color is in the spring. Slower growing, it will ultimately become a small tree.

Ht: 6-8'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Purpurea' 'Purpurea' European Beech

A synonym for 'Riversii'. Dark purple foliage on a full size plant.

Ht: 15-20'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Red Obelisk' 'Red Obelisk' European Beech

A columnar form. New leaves are reddish and then fade to dark purple. Fast upright growth. Use where height is desired or space is limited.

Ht: 15-20' Spread: 4-5'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Rohanii' 'Rohanii' European Beech

A purple form with wavy and slightly curled leaves. Upright habit. Medium rate of growth.

Ht: 10-12'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Sartini Bicolor' 'Sartini Bicolor' European Beech

A bright yellow stripe on green foliage. Color holds well into the summer. Slower growing.

Ht: 8-10'

Full sun-part shade

Zone 4-7

*Fagus sylvatica* 'Striata' 'Striata' European Beech

An unusual leaf—the leaf is has green color along the venation with bands of bright yellow inbetween. Best effect is in the spring. Slower grower. An eye catcher!

Ht: 6-8'

Full sun-part shade

Zone 4-7

### **Ginkgo (Ginkgo)**

*Ginkgo biloba* 'Green Pagoda' 'Green Pagoda' Ginkgo

An interesting teardrop form that is very tightly branched. Slow grower. Makes an interesting specimen!

Ht: 6'

Full sun Zone 3-7

**Hamamelis (Witch Hazel)**

Hamamelis x intermedia 'Aurora'

'Aurora' Witch Hazel

Larger than normal blooms that are bright yellow with a red tinting at the base. Scent is sweet and strong. Fall color is yellow-orange. Habit is upright when young and then broadens with age to vase shape.

Ht: 6-8'

Full sun-part shade

Zone 3-7

Hamamelis x intermedia 'Orange Peel'

'Orange Peel' Witch Hazel

Flowers are slightly curled & orange in color as the name suggests. Scent is sweet and flowering time is a little later than most (Feb-Mar). Foliage is sturdier than most and looks good going into the fall. Fall color is red-orange. Habit is upright when young and then makes a rounded bush

Ht: 5-7' Spread: 5-7'

Full sun-part shade

Zone 3-7

Hamamelis virginiana 'Mohonk Red'

'Mohonk Red' Witch Hazel

A red flowering native Witch Hazel. Blooms in September. Scent is slight. Fall color is yellow. Habit is upright when young and then broadens with age to make a rounded bush.

Ht: 6' Spread: 4'

Full sun-part shade

Zone 3-7

Hamamelis vernalis 'Kohankie Red'

'Kohankie Red' Witch Hazel

Flowers are reddish purple and slightly crimped. Slightly scented. Blooms in the spring (March-April). Fall color is orangish, then turns crimson. Habit is upright when young and then broadens with age.

Ht: 5-6'

Full sun-part shade

Zone 3-7

**Liquidambar (sweet Gum)**

Liquidambar styraciflua 'Variegata'

Variegated Sweet Gum

Star shaped leaves that are mottled and streaked with gold. Faster growing than 'Silver King'. Can grow up to 2' per year. Fall color is pink, burgundy and gold.

Ht: 15'

Full sun-part shade

Zone 4-8

Liquidambar styraciflua 'Worplesdon Variegata'

'Worplesdon Variegated' Sweet Gum

A unique new variegated form of Sweet Gum. Slow growing with interesting shades of green, blue-green and dark green on each leaf. Fall color is orange, scarlet & gold.

Ht: 6'

Full sun-part shade

Zone 4-8

**Picea (Spruce)**

Picea abies 'Gregoryana'

'Gregoryana' Norway Spruce

A dwarf alpine appearance with short stubby needles. Slow growing globe shape. A great choice for rock gardens.

Ht: 2' Spread: 2'

Full sun

Zone 3-6

*Picea engelmannii* 'Hoodie' 'Hoodie' Engelman Spruce  
A small blue needled form. Slow growing into a pyramidal shape.  
Ht: 3-4'  
Full sun  
Zone 4-7

*Picea glauca* 'McConnell's Gold' 'McConnell's Gold' White Spruce  
A slow pyramidal form with greyish-green needles. New push of growth is bright yellow.  
Ht: 6'  
Full sun  
Zone 3-7

*Picea glauca* 'Pendula' Weeping White Spruce  
A nice weeping form with light blue needles. Each branch appears to change direction and cascade down.  
Nice specimen.  
Ht: 6-8'  
Full sun  
Zone 3-7

*Picea orientalis* 'Nutans' 'Nutans' Oriental Spruce  
A slow growing globe form that eventually will form a leader and become a broad pyramidal form. Dark green needles.  
Ht: 6-8'  
Full sun  
Zone 3-6

*Picea pungens* 'Aurea' 'Aurea' Colorado Blue Spruce  
Bright yellow needles on a slow pyramidal form.  
Ht: 8'  
Full sun  
Zone 3-6

*Picea pungens* 'Blue Wave' 'Blue Wave' Colorado Blue Spruce  
A bright blue spreading form. Does not send up any leaders and will stay flat to the ground.  
Ht: 18" Spread: 6-8'  
Full sun  
Zone 3-6

*Picea pungens* 'Thume' 'Thume' Colorado Blue Spruce  
Bright blue form with a globe shape when young. As the plant matures, it ultimately forms a leader to become a short fat pyramid. One of the best for color!  
Ht: 4' Spread: 4'  
Full sun  
Zone 3-6

*Picea pungens* 'Wisconsin Cream' 'Wisconsin Cream' Colorado Blue Spruce  
A dwarf pyramidal shape. Needles are greenish-blue but have a bright cream color in the early spring push of new growth.  
Ht: 4-5'  
Full sun  
Zone 3-6

### **Pinus (Pine)**

*Pinus banksiana* 'Schneeverdingen' 'Schneeverdingen' Jack Pine  
A very slow dwarf form with small needles. A somewhat globe form that flattens out. Great rock garden plant.  
Ht: 2-3'  
Full sun  
Zone: 3-7

Pinus cembra 'Blue Mound' 'Blue Mound' Swiss Stone Pine  
A dwarf blue form. Globe shape when young but will form a leader and makes a small pyramid.  
Ht: 3'  
Full sun  
Zone 3-7

Pinus flexilis '2 Mile High' '2 Mile High' Limber Pine  
A miniature green globe with brown buds. Needles are only 1/2"-3/4". It grows only about an inch or two per year. Tough and hardy native. Nice Bonsai.  
Ht: 3'  
Full sun  
Zone 4-7

Pinus koraiensis 'Jack Corbit' 'Jack Corbit' Korean Pine  
Long greenish-blue needles gives it a nice texture. Slow growing. Pyramidal habit.  
Ht: 6-8'  
Full sun  
Zone 3-7

Pinus mugo 'Shira' 'Shira' Mugo Pine  
A dwarf form that produces bright yellow new growth that fades to green. Quite a contrast in the spring! Best when pruned occasionally.  
Ht: 4' Spread: 4'  
Full sun  
Zone 3-7

Pinus mugo 'Teeny' 'Teeny' Mugo Pine  
A very tight mound shape with nice tight needles. Dark green, very hardy. Nice for very exposed areas and has a good tolerance to salt.  
Ht: 2- 3'  
Full sun  
Zone 3-7

Pinus parviflora 'Aoi' 'Aoi' Japanese White Pine  
A very compact form with short blue twisted needles. Upright but not a strict pyramid.  
Ht: 5'  
Full sun-part shade  
Zone 4-7

Pinus parviflora 'Cleary' 'Cleary' Japanese White Pine  
Many say that this plant is one of the best blue forms. Is more of a strict pyramidal shape.  
Ht: 6-8'  
Full sun-part shade  
Zone 4-7

Pinus parviflora 'Dai-Hoi' 'Dai-Hoi' Japanese White Pine  
A slow growing form of Japanese White Pine with blue-green needles. Upright habit.  
Ht: 3'  
Full sun-part shade  
Zone 4-7

Pinus parviflora 'Hani' 'Hani' Japanese White Pine  
Very similar to 'Tanima No Yuki'. Needles are bluish-green with white variegation throughout. New growth can have shades of pink as well. Slow growing, upright habit.  
Ht: 3-4'  
Full sun-part shade  
Zone 4-7

Pinus parviflora 'Miyajima' 'Miyajima' Japanese White Pine  
A slow growing upright form with blue-green needles that are tightly held to the stems.  
Ht: 2-3'  
Full sun-part shade  
Zone 4-7

Pinus peuce 'Blue Note' 'Blue Note' Macedonian White Pine  
A short blue form. Habit is globe shaped when young and becomes a small pyramid with age.  
Ht: 3'  
Full sun-part shade  
Zone 4-7

Pinus resinosa 'Quinobequin' 'Quinobequin' American Red Pine  
A bushy dense pine with a rounded habit and stiff dark green needles. Very hardy.  
Ht: 3' Spread: 3'  
Full sun  
Zone 3-7

Pinus strobus 'R.E.L. No. 3' 'R.E.L. No. 3' White Pine  
A new "broom". Very tight foliage and branch structure. Slow growing. Round habit.  
Ht: 2' Spread: 2'  
Full sun-part shade  
Zone 4-7

Pinus sylvestris 'Byst' 'Byst' Scotch Pine  
A slow growing globe form with greenish-grey needles.  
Ht: 2' Spread: 2'  
Full sun  
Zone 3-7

Pinus sylvestris 'Frensham' 'Frensham' Scotch Pine  
A curious variegated dwarf form. Needles can be pure white to mottled yellow appearing randomly on the plant. Color is especially good in the spring. Upright but somewhat globe shaped in habit.  
Ht: 4-5'  
Full sun  
Zone 3-7

Pinus sylvestris 'Rt. 11-67' 'Rt. 11-67' Scotch Pine  
An extremely tight dwarf. Globe habit. Smaller greenish colored needles. Very slow growing.  
Ht: 18" Spread: 18"  
Full sun  
Zone 3-7

### **Pseudotsuga (Douglas Fir)**

Pseudotsuga menziesii 'Densa' 'Densa' Douglas Fir  
An extremely tight and slow growing Douglas Fir in a globe form. Needles are small and a light blue-green. Never needs pruning!  
Ht: 12-15"  
Full sun-part shade  
Zone 3-7

Pseudotsuga menziesii 'Zioga's Dwarf' 'Zioga's Dwarf' Douglas Fir  
A broad dwarf pyramidal Douglas Fir with bluish-green needles.  
Ht: 5-6'  
Full sun-part shade  
Zone 3-7

### **Taxodium (Bald Cypress)**

Taxodium distichum 'Cody's Feathers'

'Cody's Feathers' Bald Cypress

Interesting foliage resembling actual feathers. Slower growing than most Bald Cypress. Somewhat rounded in habit. Bronze fall color.

Ht: 6-8'

Full sun

Zone 5-8

Taxodium distichum 'Contorta'

Contorted Bald Cypress

New contorted branching form of Bald Cypress. Still being evaluated for other characteristics.

Ht: ?

Full sun

Zone 5-8

Taxodium distichum 'Hursley Park'

'Hursley Park' Bald Cypress

A very nice dwarf form with distinctive tight foliage. Globe shape habit.

Ht: 2' Spread: 2'

Full sun

Zone 5-8

Taxodium distichum 'Little Twister'

'Little Twister' Bald Cypress

A very slow growing twisted branched form. Bronze fall color. Great for rock gardens!

Ht: 2' Spread: 2'

Full sun

Zone 5-8

Taxodium distichum 'Wavey Davey'

'Wavey Davy' Bald Cypress

Discovered by Dave Dannaher. Very slow growing. Stems are flattened and curved to give it a distinctive shape! Foliage is tight and smaller than regular Bald Cypress. Too new to determine the ultimate height, but we believe that it will remain small. Bronze fall color.

Ht: ?

Full sun

Zone 5-8
